

Case Study

Company from the construction industry

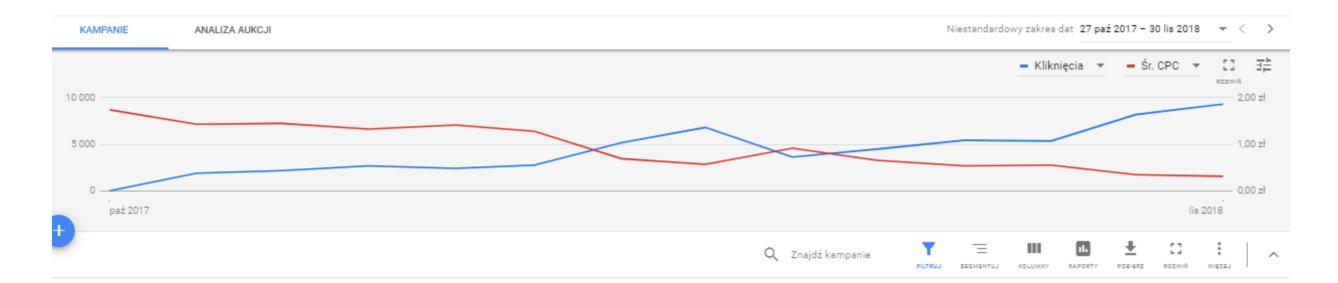

CPC reduced by 82%

Effects achieved

To achieve best possible results from the start, we used our artificial intelligence optimizer, which allowed us to reduce CPC by 82%. With that, we were able to increase number of clicks by 461%.

Before optimization, cost of one click was 1,74zł – it allowed us to generate 2299 visits, assuming our budget was 4,000zł at that time. By reducing the CPC to 0,31zł, we were able to increase potential number of visits to 12903, which is 10604 more enteries to the site without changing the overall budget.

Our strategy

Development of our stategy begun by choosing the most precise keywords that were generating a large number of queries for our Partner. Our goal was – for the most part – to gain as much conversion from contact form, contact tab and phone calls as possible. During implementation, we've narrowed down the keywords to the ones with the biggest conversion precise phrases, such as "trapezoidal sheets t18 / t35" proved to be the best for task mentioned above. In addition, we reduced the campaign to 12 voivodships, where the most profitable inquiries were made. Thanks to that decision, we were able to work out even higher return on investment.

Contact our specialist

Feel free to contact us - if you have questions, we will gladly answer them.

We guarantee full support and consultancy at every stage of using Skalium.

Best regards, Skalium Team
